

LSS Network and Application Hosting

With an LSS Network and Application Hosting subscription, businesses have access to fully managed network servers, virtual desktops and integrated office productivity software – all via the Internet. Staying current with technology has never been easier or more affordable. All you need is a computer, a printer and an internet connection. And there is absolutely no cost to get started.

Just log into the virtual desktop, hosted on one of our professionally managed servers, and get unlimited use of all the applications included in the subscription. It's that simple. Whether your business has one user that works from the office and from home, or dozens of users spread throughout multiple offices, everyone can seamlessly share programs, applications and data – just like you had a server in your own office, only better.

Simple and Affordable

There are no up-front costs. There is nothing to buy. You don't need to purchase servers, networks, operating systems or applications. LSS supplies the server hardware and application software, provides access to the network, and manages everything for you. You just pay a flat monthly subscription fee. It is so simple, that in just one business day, LSS could have your entire business up and running on a new hosted system.

Comprehensive Solutions

Subscription packages can include all of the operating systems and applications listed below, plus many others. Check with us if you need a solution that isn't listed here. LSS hosts several other specialty programs and is adding new applications all the time.

- Microsoft Windows Server
- Microsoft Exchange Server
- Microsoft Terminal Services
- Microsoft Outlook 2007
- Microsoft Word 2003 and 2007
- Microsoft Excel 2003 and 2007
- Microsoft Powerpoint 2003 and 2007
- Microsoft Access 2003 and 2007
- Microsoft Communications Server 2007
- LSS Time and Billing
- LSS Financial Management
- LSS Case Management
- LSS Document Management
- LSS Document Assembly
- LSS Workflow Management
- PDFCreator
- Adobe® Reader®
- Email Integration for Blackberry Devices

Flexibility

You can modify the subscription from month to month, or cancel it at any time. If you need to add a few users on a temporary basis, they can be added one month and removed the next. If for any reason you decide that an LSS hosted solution isn't the right solution, the entire service can be cancelled without penalty.

Scalability

LSS can scale its servers to meet practically any demand. If your requirements change and you need more disk space or additional processing power, the request can usually be fulfilled overnight. Whether you have one user, or one hundred users, LSS has servers ready to deliver the power and performance that you require today and well into the future.

Servers and Network

LSS hosts and manages all applications on enterprise-class servers located at our facility. Customers access the system via the internet from their own computers (including Mac's).¹ LSS provides the servers, network operating systems, installation services, version updates, backups, ongoing system maintenance and unlimited customer support.

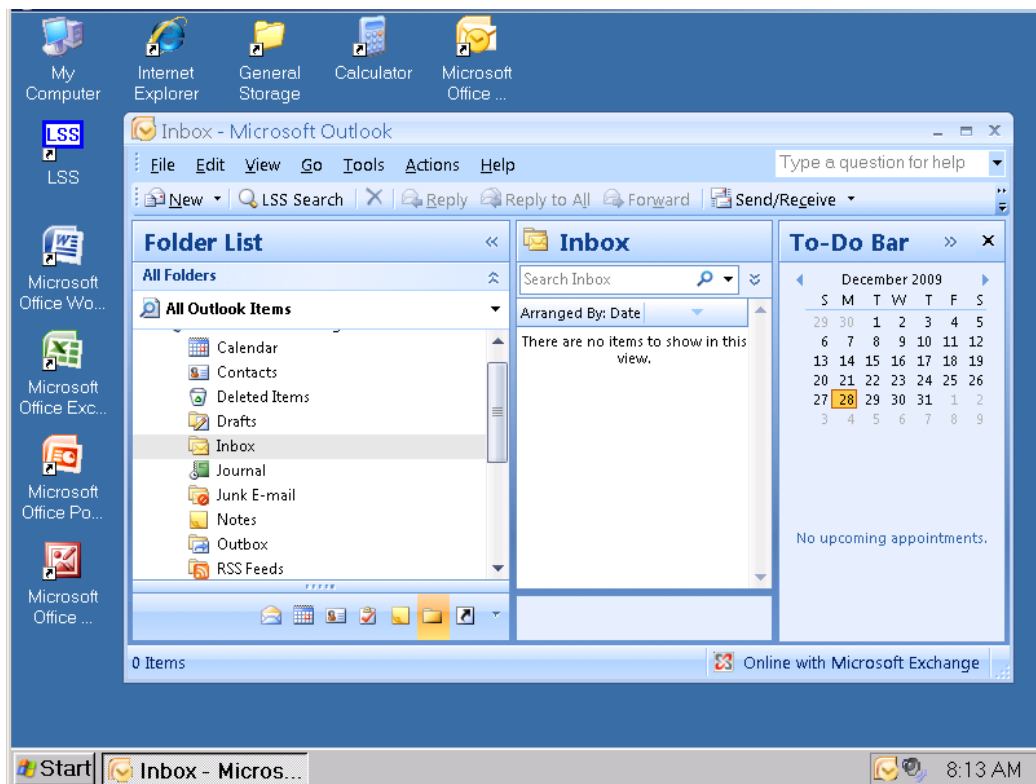

- Dell servers featuring Intel® Xeon® X5570 processors
- Dell mission critical 24x7 support, 4 hour on-site response
- Hot-swappable redundant disk drives
- Hot-swappable redundant power supplies
- Preconfigured spare servers on standby
- Anti-virus, anti-spam and firewall protection

Performance and Reliability

Since the launch of our Network and Application Hosting service in January of 2008, all systems have maintained a nearly perfect score for performance and reliability – exceeding 99.9% system uptime. LSS utilizes multiple internet carriers, enterprise-class servers, redundant hardware components and performs rigorous testing of all system configurations to ensure the most reliable operation for our clients.

Virtual Desktop

With an LSS Network and Application Hosting subscription, each user gets their own virtual desktop with all the applications preinstalled and preconfigured. Unlike other browser-based “cloud” solutions, the LSS desktop looks and feels just like the Windows desktop people are accustomed to working with every day.

Microsoft Office

Choose either Office 2003 or Office 2007. Both versions include Word, Excel, PowerPoint and (optionally) Access. LSS will install, configure and maintain the applications on the virtual desktop for you. And there is no software to purchase – everything is included in the monthly subscription fee. Just log in and start working. And to help you work more efficiently, Law Firm Edition hosting packages include the LSS Document Management system at no additional charge.

Outlook and Exchange

With Microsoft Outlook and Exchange Server, LSS can host your email, calendar and contacts, allowing you to easily share information with others in your company. Microsoft Outlook is included in the subscription and is configured on every virtual desktop. Each user also gets a free copy of Outlook to install on their own computer, making it simple to synchronize the hosted Exchange mailbox with Blackberry devices and other local applications. LSS even provides secure access to your mailbox from a web browser.

Integrated Law Firm Management Software

Law Firm Edition hosting subscriptions include unlimited multi-user access to the LSS Law Office Management System. Designed specifically for law firms, the LSS Law Office Management System is a comprehensive integrated software package that helps you efficiently manage your office and your clients. From Case Management to Financial Management, the LSS software provides everything you need in one easy-to-use system.

<u>Case Management</u>	<u>Financial Management</u>
<ul style="list-style-type: none">• Time Entry with Multiple Timers• Conflict of Interest Checking• Rules-Based Calendar/Docket• Contact Management and Case Notes• Records Management• Mass Mailing• Document Management	<ul style="list-style-type: none">• Time and Billing• Task-Based and Electronic Billing• Profitability and Financial Reporting• Trust Accounting and Reporting• General Ledger and Check Reconciliation• Accounts Payable and 1099 Reporting• Workflow Management

For more details about the LSS Law Office Management System, visit www.LegalSoftwareSystems.com

Integration with Outlook

The LSS Case Management, Document Management and Workflow Management systems integrate seamlessly with Microsoft Outlook and Exchange. Rules-based calendar events entered in LSS automatically appear in Outlook. Using the LSS Document Management System, emails can be profiled and archived to Exchange public folders. Client/matter contact information in the LSS billing system can be exported to public contact folders available in Outlook. And LSS Workflow automatically sends users an email notification whenever a workflow form requires attention.

Data Protection

All data gets backed up every weeknight to removable media which is saved for three weeks before being overwritten. Other than the media being used for the current backup, all backups are stored off-site. Exchange mailboxes are backed up using a system that allows individual email messages, appointments and contacts to be restored on demand. But most importantly, LSS creates an extra backup of all your data each month and ships it directly to your office – for you to keep as long as you want.

Service

In addition to reliable networks and state-of-the-art software, each subscription also includes world-class service and support. The staff at LSS includes professional network administrators, application specialists, full-cycle bookkeepers, as well as the programmers who developed the LSS Law Office Management System. Our staff is available to help with any question you have about the use and operation of the software included in your subscription. Upon request, the LSS staff can even provide data entry, billing and bookkeeping services for your business.²

Free Trial

Call us to schedule a short on line demonstration. After the demo, if you think an LSS Network and Application Hosting solution might be a good fit for your business, we'll set up a trial system that you can use for 30 days – free of charge.³

Prices

Comprehensive hosting packages are available for as little as \$50 a month per user for the Basic Edition or \$100 a month per user for the Law Firm Edition. There are no annual contracts and you can change or cancel the subscription at any time. Subscriptions are tailored to your specific requirements, so please call for an exact quote.

Additional Benefits

LSS has a website showcasing many other benefits of hosted solutions. The website explains how hosted solutions can extend the life of older workstations, contribute to a greener environment, reduce costs, improve efficiency, and help you stay current with quickly changing technologies.
